

(Continued from Page 1)

the fields of psychiatry and psychology, they must come to dominate the entire field of mental science in the hospitals and in the universities. "They must labor to increase the personnel and facilities of 'mental healing.'" They must "carry forward the myth that only a European doctor is competent in the field of insanity," and thus excuse among them "the high incidence of foreign birth and training."

3—Propaganda shall be disseminated to create general public terror of insanity.

4—As psychopoliticians, they must work until they have "dominion over the minds and bodies of every important person in America." They are to "achieve such disrepute for the state of insanity and such authority over its pronouncement that not one statesman so labeled could again be given credence by his people."

5—To cripple the efficiency of leaders (religious as well as political) leading to their removal from public office or position, they must strike insanity into their families through the secret use of drugs. When the individual is too resistive, they may bring about insanity in the leader himself.

6—They "must work until suicide arising from mental imbalance is common and calls forth no general investigation or remark."

(The Russian Textbook on Psychopolitics states that "when the loyalty of an individual cannot be swerved . . . it is usually best to occasion a mild neurosis in the person by any available means, and then, having carefully given him a history of mental imbalance, to see to it that he disposes of himself by suicide, or by bringing about his demise in such a way as to resemble suicide." Psychopolitical operators within and without Russia have "handled such situations skillfully tens of thousands of times," says this textbook. Should an inquest into the "suicide" or sudden mental derangement of any political leader be in order, it must be conducted only by psychopolitical operators or their dupes, whether psychopolitics is responsible or not).

7—They must bring about legislation on "mental healing," thus making the capitalists, "by his own appropriations, finance a large portion of the quiet Communist conquest of the nation." To further their ends, they must "use the courts, use the judges, use the Constitution of the country, use its medical societies and its laws." They must form "healing societies."

8—Upon those held in American institutions for the insane or in prisons without civil rights nor any hope of freedom "can be practiced shock and surgery so that never again will they draw a sane breath." They must "make these treatments common and accepted." They must "sweep aside any treatment or any group of persons seeking to treat by effective means."

9—Should there be a public hue and cry against Communist "mental healing," and should it occur that "mental healing" be taken out of the hands of their psychiatrists and psychologists and be placed in the hands of ministers, they must not eat or sleep or spare the tiniest bit of available money to "campaign against it, discredit it, strike it down and render it void."

In the closing remarks of his address, Beria said: "By psychopolitics, create chaos. Leave a nation leaderless. Kill our enemies. And bring to Earth, through Communism, the greatest peace Man has ever known."

Marxist Definition of Mental Illness

Dr. George Stevenson, consultant to the National Association for Mental Health and former treasurer of the World Federation for Mental Health, describes a mentally ill person in his booklet, Education for Mental Health, as one who is "suspicious of others and sees an enemy, perhaps a Communist, lurking behind every acquaintance, etc."

The Russian Textbook on Psychopolitics gives substantially the same definition:

"One of the first and foremost missions of the psychopolitician is to make an attack upon Communism and insanity synonymous. It should become the definition of insanity of the paranoid variety that 'a paranoid believes he is being attacked by Communists.'

SIGMUND FREUD

NOW LET US CONSIDER SIGMUND FREUD, THE GREAT OLD JEWISH QUACK OF VIENNA. "Mental Health" has become quite a fad in the U.S.A. Very often, the head of the local "Mental Health" organization will also be the local head of the Anti-Defamation League. This is another instance in which Jewish villany and fraud are concealed behind a smoke screen of spurious idealism. "Freudian" Psychiatry has a proven record of fifty years of ABSOLUTELY COMPLETE FAILURE to deal with the problems of mental illness in any effective way. Our mental hospitals are full of people suffering terribly. The Freudian Quack who practices Psychiatry charges high fees, and he cannot cure or even materially benefit anybody suffering from any real psychosis. Freudian psychiatry has held back research into the real causes of mental illness for fifty years. It is quite certain that real mental illness has a physical cause. In many cases it is hereditary. Competent medical research could discover the cause and the cure of most

SIGMUND FREUD

Founder of psycho-analysis, patriarch of all present-day "mental health" rackets. Freud's diabolical theories form the basis for all psychiatry in current mental health programs.

forms of mental illness. What prevents this research from taking place? The Freudian Quacks, who have waxed rich on the misery of suffering Mankind. It is to the eternal disgrace of the American Medical Profession that it has allowed this form of Jewish charlatanism to flourish unchallenged. Freudian Psychiatry is so utterly a fraud that it ought to be a matter for the Bunko Squad of the Police Department, and anyone who practices such a consummate fraud ought to be arrested and jailed for accepting money, under false pretenses. There is no hope for anyone suffering from the real mental illness in the U.S.A. today. Freudian Psychiatry is merely a device for building Jewish political power for the destruction of the Christian.

Thus, at once the support of the individual so attacking Communism will fall away and wither."

This definition is comparable to one that would identify a normal individual who is afraid to walk into a snake pit, with a man in delirium tremens who imagines he sees snakes.

The late Merwin K. Hart, of the National Economic Council described the "Mental Illness" program, which he said "masquerades under the misnomer 'mental health,'" as a Marxist weapon to silence all opposition to Communism and to remove out of the way those who resist the idea of "world citizenship," the goal of the United Nations. In this regard, Mr. Hart wrote:

"The most important publication in which the concealed purpose of the mental health movement is subtly outlined is Mental Health and World Citizenship, distributed by the National Association for Mental Health. This document says: 'Principles of mental health cannot be successfully furthered in any society unless there is progressive acceptance of world citizenship.'

"If accepted, this 'norm for mental health' could establish international socialism."

"Opposition to the widening power of the mental health elite is based on several factors. The definition of mental health is unsatisfactory so long as it has political implications. The techniques for handling mental cases are becoming too brutal (shock treatment was introduced into the United States by Dr. Joseph Wurtis, a pupil of Sigmund Freud's and a documented Communist, according to Counter-Attack, April 8, 1955). Drug therapy is compulsive and an invasion of the person. Psychosurgery, such as lobotomies, can create permanent docility. Drug therapy and shock treatment have been used on political prisoners of Communist regimes in Europe and in Asia where they are already an accepted technique to be used on persons of 'unreconstructed' attitudes. Charges of 'mental instability' are increasingly being made in cases where the victim disagrees with policy in which he becomes involved . . .

"Mental health" is an inaccurate label for what is really a weapon being skillfully used by Communist propagandists to bring about conformity to the Marxist ideology. The aim is unmistakable: non-conformists will be in actual peril of being adjudged insane."

"If the American people value their freedom of thought and expression, they will do well to regard as suspect every legislative proposal bearing the 'mental health' label. To resist this enveloping 'mental health' threat is vital to American liberty. To delay invites disaster."

The Marxist "mental healing" program is not only directed against statesmen and religious and civic leaders who stand in the way of the Left-wing, but against Christians in general. In this, there is perfect agreement with the objectives of modern psychiatry within WHO as defined by Dr. Chisholm.

The Russian Textbook on Psychopolitics states: "You must work until religion is synonymous with insanity. You must work until the officials of city, county and state governments will not think twice before they pounce upon religious groups as public enemies." Another statement reads: "By thus inviting the cooperation of the population as a whole in mental health programs, the terrors of mental aberration can be disseminated throughout the populace."

This means that should plans come to fruition, the public, acting upon the terror instilled in them will not hesitate to report to the proper authorities a person who gives Christian testimony or group of persons engaged in religious exercise or Christian activities.

Progress of the Plan

The Left-wing servants of Satan who work behind the scenes through Communism to accomplish their goal of world dominion have come a long way in fulfilling their vicious program.

The American people have been made very much aware of the subject of Mental Health through numerous books, magazines, articles, posters, etc.

It used to be that whenever people suffered from extreme grief, disappointment, guilt, fear or had any great emotional problem, they sought the help of Christian ministers through whom by the Word of the Lord and by prayer, they obtained comfort, peace, forgiveness, new faith and courage or a solution to the problem troubling them. Today, people are flocking instead to the psychiatrists.

Dr. James DeForest Murch in another one of his editorials observes: "Godless psychiatrists, psychologists and sociologists are making America a nation of neurotics and psychopaths. There is no place on earth where there are more emotional ailments, mental illnesses and pathological idiosyncrasies. It is getting so that anyone who experiences disappointments, grief, anxiety or faces difficult problems promptly rushes to a psychiatrist . . . The treatment is often worse than the complaint."

According to Mr. Hart, "healing societies" in the form of Mental Health Associations or Foundations have sprung up everywhere.

"This Marxist apparatus is now entrenched in every state of the Union with separate units in many counties and even municipali-
